

Master your SQL Server enterprise with MinionWare

minion
ENTERPRISE

- Time saved** *Minion Enterprise centralizes, simplifies, and streamlines a multitude of common DBA tasks.*
- Secure servers** *Track new or dropped users - even in AD groups - alert on sysadmin membership, and find weak passwords.*
- New user setup** *Set up new users, standardize account permissions, and script out security in seconds.*
- 95% faster audits** *Minion Enterprise allows you to satisfy audits for your entire shop from one central location.*
- Centralized backups** *Integrate Minion Backup to provide central configuration, logging, and alerting.*
- Minimize recovery time** *Service down alerts and service account visibility increase server uptime.*
- Centralized maintenance** *Minion Enterprise and Reindex team up for central index upkeep.*
- Predict disk space growth** *Predict disk usage based on a history of data growth.*
- Central performance research** *Review indexes for issues across all SQL servers.*
